

Title: Quality Assurance Specialist

Location: Markham, ON

Industry: Financial Services Software

Department: Technology

Company URL: <http://www.solidifi.com>

Job ID #: TECH-102

About Us

Solidifi is a leading provider of collateral valuation, risk management and data analytic services to the North American mortgage industry. Solidifi provides mortgage lenders, professionals and 3rd party service providers with a flexible service platform for procuring collateral valuations from marketplace vendors and appraisers, with complete transparency and data to make "incredibly smart decisions". Solidifi currently serves leading global financial institutions with United States head office in Chicago and Canadian head office in Toronto.

Position Description

Reporting to the Vice President of Application & Data Services you will be responsible for successful analysis, planning, deployment, implementation and maintenance of the quality assurance program development and quality controls throughout the SDLC for web-based financial mortgage processing software.

Responsibilities

- Create test plan and test cases based on software specifications, performance and regression
- Execute function, performance and regression test cases and track incidents (bugs)
- Repeat test and smoke test following bug fixes
- Liaise and communicate with business analysts and developers to improve quality of both specifications and software

Skill Required

- Extremely competent, capable of developing and executing test strategy/plans and test cases for highly complex products to ensure client requirements are met and product is delivered error free.
- Capable of establishing quality assurance process and procedures across the SDLC.
- Deep understanding and experience in all aspects of testing from unit, integration, system, functional, regression to acceptance is required. Review of design documents (verification).
- Ability to identify, analyze and recommend alternatives and resolve complex testing problems
- Ability to assess perceived quality, business/customer impact and associated functional /technical risk.
- Deep understanding of SDLC, STLC best/proven practices in Software Testing and Quality Assurance, Risk Based Testing, Mercury (HP) Quality Center and Quick Test Pro
- Knowledge of Banking/Finance Industry
- Strong drive passion fore excellence and self starter attitudes are critical for this role

- Need to be a strong communicator (written and verbal)

Education and Training Required

- University degree in Information Technology, Business Administration, or related discipline.
- Additional technical and/or business certifications are an asset.

***Scope of responsibilities for this particular opportunity may change and will include, but not be limited to the above mentioned.**

The opportunity is here if you're ready for it: work with the industry's top talent on dynamic, challenging projects for the North American mortgage industry.
